Source: Outcome coverage was approximated through Bridgespan analysis and based on interviews and secondary research. For broader websites, outcome coverage was assessed primarily based on the clearinghouse functionality (e.g. FindYouthInfo.gov).

1. Outcomes covered by 'Social Welfare' for The Campbell Collaboration was based on: [http://www.campbellcollaboration.org/SWCG\\_Our\\_Group/area\\_of\\_work.php](http://www.campbellcollaboration.org/SWCG_Our_Group/area_of_work.php).

Note: Clearinghouses present these types of information either at the intervention or study level; in particular, information is often provided at the study level for 'Interventions lacking minimum standards/eligibility' and 'Interventions reviewed but not rated.'

1. Designation of 'strong evidence' varies by clearinghouse; however, unless clearinghouses include programs that show low/little/no evidence, they do not receive a check in this category.
2. While the Coalition for Evidence-Based Policy does rate programs as 'Near Top Tier', and includes not rated programs on the 'Programs That Work' site, all listed programs are determined to have strong evidence to a certain extent and are promising with regards to effectiveness.
3. On its 'Top Tier Evidence' site, the Coalition for Evidence-Based Policy lists but does not provide additional information on interventions reviewed but not rated to date.
4. CrimeSolutions.gov's 'Insufficient evidence list' is provided in a document that needs to be downloaded from the website, and encompasses interventions with a lack of strong evidence.
5. FindYouthInfo.gov leverages databases from CrimeSolutions.gov and Teen Pregnancy Prevention; assessments are based on information available across both databases.
6. National Registry of Evidence-based Programs and Practices and What Works Clearinghouse include interventions in progress of being reviewed, but not those still to be reviewed.
7. National Registry of Evidence-based Programs and Practices does not assess an intervention's effectiveness.

Source: Assessment of inclusion is based on Bridgespan analysis through interviews and secondary research.

Note: Assessment is intended to capture types of intervention-specific information that are captured

systematically, extracted, and displayed as an identified section in an intervention profile; information is not designated as available if it is only captured on an ad-hoc basis, within a program description, etc.

1. CrimeSolutions.gov and OJJDP's Model Programs Guide use the same underlying database.
2. FindYouthInfo.gov leverages databases from CrimeSolutions.gov and Teen Pregnancy Prevention; assessments are based information available across both databases.
3. CrimeSolutions.gov and OJJDP's Model Programs Guide do not have sections labeled as cost/benefit, but this is sometimes included within cost information.
4. What Works Clearinghouse captures cost and contact information in full intervention reports that can be downloaded from the website, but not directly on the intervention profile page.
